

20 YEARS OF COMMITMENT TO SAFETY

20 YEARS SAFETY

POSITIVE PRESSURE

The SE400 system keeps giving you positive pressure air no matter how hard you breathe.

With a program of high-level protection, communication, pressurised suits and a wealth of accessories, the SE400 system is the natural choice for the most demanding work.

SE400AT-2

Our newest positive pressure demand respirator. More than 400 l/min of clean air for the most demanding work in industrial and rescue operations alike.

NEW

The new battery management system lets you condition, recharge and store up to 28 batteries from a single powerpoint.

The best of both worlds.

Since 1984, S.E.A. has offered the best there is in both negative pressure and positive pressure respirators.

NEGATIVE PRESSURE

For over twenty years, Sundstrom has proven itself as the ultimate in negative pressure filter protection. Nothing comes close in ease of use, low breathing resistance, high protection levels, and true system thinking with a wide range of filters and accessories.

SR200

Silicone full face mask with curved visor for a wide field of vision. Accepts filters and compressed air supply.

SR100

Sundstrom's true workhorse: silicone half mask with fittings for filters, supplied air and lots of accessories.

SmallTalk

Fitted to full and half masks, SmallTalk offers clear voice communication while wearing your respirator.
