

Designed,
engineered and
made in Australia

When every breath counts.

The SE400 fan supplied, positive pressure respirator gives you over 400 litres per minute of clean air. That means true positive pressure even at hard work.

You don't have to carry heavy cylinders that need to be changed frequently: the SE400 just keeps giving you safe breathing air during the entire shift.

Available with dust suits, encapsulated gas suits and domestic preparedness suits — all pressurised for body ventilation and minimised risk of inward leakage.

Of course, you also get loud and clear voice communication; an essential for efficient team work.

The SE400 is used by emergency squads, rescue teams, tactical response groups, military, fire, medical and police operations all around the world.
