

Old technology sucks.

A motor.

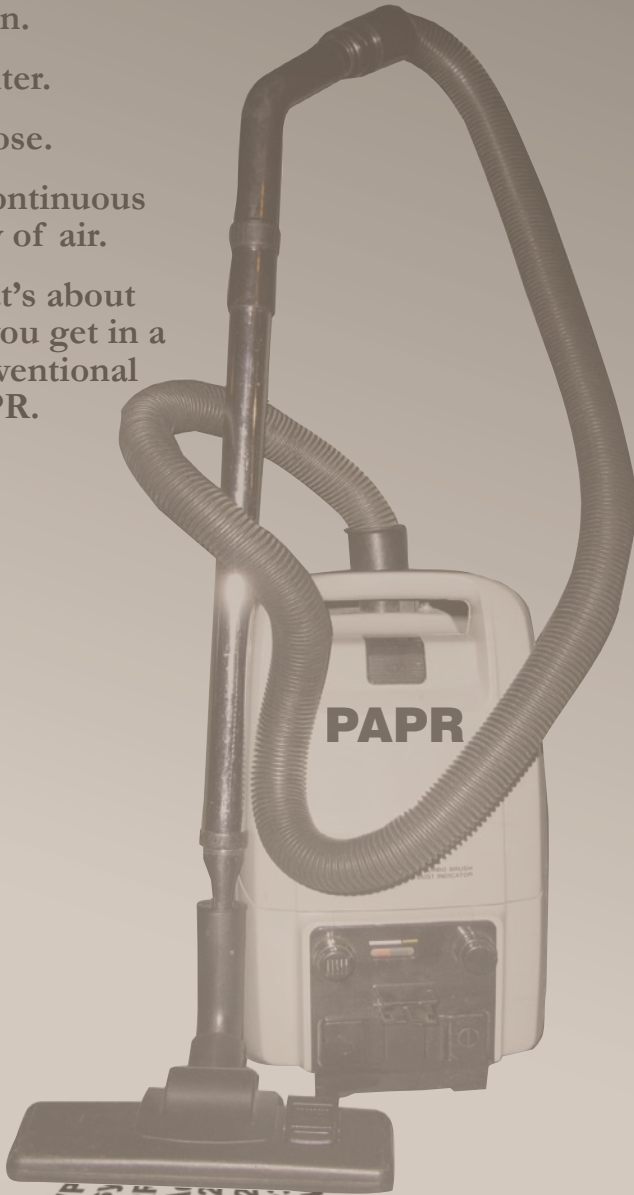

A fan.

A filter.

A hose.

A continuous flow of air.

That's about all you get in a conventional PAPR.

New technology delivers.

True positive pressure demand system.

Designed and manufactured in Australia.

Single-button operation.

Visual and audible alarms.

Loud and clear voice communication.

Mounted on padded backpack.

All this and much more.

The SE400 is much more than an ordinary PAPR. Made to deliver clean air, no matter how hard you work.
