

First Response.

The positive pressure respirator system from the specialists in personal protection for first responders

SE400AT-2 is a positive pressure demand powered air purifying respirator specially designed for first responders and other emergency personnel.

In combination with the SE-SHIELD pressurized suit, tested against chemical and biological warfare agents, the SE400AT-2 is the ideal respirator for all warm-zone activities.

The SE400AT-2 keeps working for hours, providing clean air at a rate of more than 400 l/min peak inhalation air flow — which means positive pressure and effortless breathing even during hard work.

The SE400AT-2 is used by defense forces, police and rescue squads, first responders, domestic preparedness outfits, ambulance teams, paramedics and other emergency personnel around the world.
