

SE400AT-2

THE NEW GENERATION

Designed,
engineered and
manufactured in Australia

The new SE400AT-2 fan supplied, positive pressure, breath responsive respirator now offers a host of improved and innovative features.

Of course, SE400AT-2 still offers superior performance and protection: you still get over 400 litres per minute of clean air — far beyond the point where conventional fan respirators give up.

No other fan supplied respirator can boast a protection factor of 2000+.

An extensive range of suits, welding shields, backpacks, belts and other accessories is also available.

New swivel hose connection lets you position the unit with great flexibility

The self-locating, water-resistant connector is quick and easy to fit

In certain climatic conditions, press and hold the SE-TALK button to demist your visor rapidly

The new regulator is set at an angle for a perfect view of the indicator light, and features an enhanced snap-lock.
