## Workplace Protection Factor

# 2000+

IDEAL FOR  
MINES, SMELTERS,  
INDUSTRIES, FACTORIES,  
DOMESTIC PREPAREDNESS,  
ANY DUSTY, TOXIC OR  
CONTAMINATED  
AREAS

EDINBURGH, 2001: Comprehensive independent testing has concluded that the new SE400AT positive pressure air purifying demand respirator is the only of its kind to achieve a 95th percentile Workplace Protection Factor greater than 2,000 in people performing asbestos removal operations.

This means that the SE400 is the first fan-supplied air

purifying demand respirator in the world to achieve protection factors equal to SCBA.

The independent tests were conducted by the well-respected Robin Howie Associates respiratory protection specialists in Edinburgh, and the results are available in an extensive test report.
