NO OTHER respirator gives you...

Single button operation

Half OR full face piece

Very low breathing resistance

Extensive warranty

3 years or 6,000 hours on motor and main circuit board

True positive pressure

Complete usage reporting

In-mask communication

Filter & battery warning

2-hour battery charge

Great range of accessories

Efficient filter use

Often less than 50% filter consumption compared to other fan-driven systems

SCBA protection level

meets all requirements for SCBA in filtrable, non-IDLH atmospheres with enough oxygen for human breathing

If your respirator fails to supply clean air all the time, why use breathing protection at all?

SE400 gives you clean air. As much as you want. All the time. No matter how hard you work.

www.sea.com.au

TRUE BENEFITS

All the air you need.

True positive pressure up to 400 l/min — not a mere 120-180 l/min.

Big savings on filters.

Demand air supply means great savings on filter consumption

Know what's happening.

You'll always know that you're getting the protection you need.

Communication.

Crystal clear voice transmission

One button operation.

Put it on. Breathe. It couldn't be

CONFIGURATIONS

Wear SE400 with a half or full face mask; on a back pack, waist harness or ordinary belt. Over your shoulder or around the side. The choice is yours.

The SE400 is also available for use with specially designed protective suits in a variety of chemical and fire resistant materials. Can be worn inside encapsulated suits or outside conventional

FACE PIECES

1: Half mask available in three sizes

2: Full face mask in silicone

3: Full face mask in

The SE400 is available with a range of half and full face pieces in different sizes and materials.

Whatever your choice, your SE400 is available with an ever growing range of accessories, for even greater comfort, communication and safety management.

**The SE400.
Not just wishful
thinking.
It is here now.**

Slip-on sleeve for the breathing hose. Comes in spark & flame proof material

Welding visor with flip-up shade can be attached to any of the

Clear visor film for messy work. Simply tear off when splattered

Back pack with padded shoulder straps, waist strap and an arched backplate that keeps the SE400 away from the body

Padded waist harness for balance and comfort. Use it with or without shoulder

Eyewear inserts for full face mask. Can be fitted with prescription glasses, yellow lenses for smoke and low-light, or brown or

What makes SE400 cost saving?

Low filter consumption

- Air passes through filters ONLY when you breathe in
- 50% less filter usage on average, compared to other fan driven respirators
- Filter usage comparable to conventional negative pressure half- or full face masks

High work performance

- Great comfort means better user acceptance
- Positive pressure means much higher work performance
- Very high protection factor means better workers' health and less sick leave

The SE400 gives you one more thing: Peace of mind.
How valuable is *that* to you and your family?
