DEMOLITION WORK

ASBESTOS REMOVAL

Breathe safely in demanding conditions

Positive pressure is maintained at all times — even at very hard work. Protection level similar to SCBA.

The SE400 can be used in wet conditions and withstands wet decontamination without problems.

No hose restrictions. No trip hazards. No heavy bottles on your back. No need to replace cylinders.

Your voice is loud and clear with an in-mask microphone and a powerful external clip-on louspeaker.

The SE400i uses less than half the filters compared with conventional PAPR respirators.

Instructions. Posters. Videos. Computer-based training. Most available from the website.

WHERE ALL THE PIECES COME TOGETHER.
