

# Solo Rescue® Field Edition

## Taking decontamination on the road

When fighting certain types of fires, like bush fires or factory fires, there is often an immediate need to be able to decontaminate SCBAs and other PPE on sight. With the Solo Rescue Field Edition, it is possible to do just that. By installing it in a trailer for instance, you would be able to bring it with you onto the site enabling decontamination in the field, thus minimising toxic exposure to carcinogens during conditions that otherwise would not be possible.

The Solo Rescue Field Edition is suitable for a large variety of applications, for instance:

- Mobile rescue units
- Hazmat trailers
- Command centers
- Marine applications

The technical specification is the same as for the standard version of the Solo Rescue Decon Washer with the main difference that it comes equipped with special feet that enables the machine to be bolted in place and an extra level sensor to ensure robustness and function of the machine when mounted on a mobile platform.

### Technical Specification

Power supply	3-phase 400/415V, 50Hz
Fuse	32 A
Wash temperature (depending on application)	30–60°C
Water supply	3–10 °dH *
Pressure, incoming water	1-6 bar, 15 liter/min
External dimensions H x W x D	1744 (open 2084) x 1025 x 887 (open 1316) mm
Weight (empty machine)	238 kg
Tank volume	108 liters

\*For best cleaning performance we recommend 3–7 °dH.

**WARNING!** RESCUE Intellitech disclaims any and all liability for any damages or injury to persons, property or otherwise resulting from (i) inaccurate or insufficient instructions by a PPE manufacturer with respect to the use of the Solo Rescue®, (ii) use of the Solo Rescue® in a way that does not correspond with the washing instructions of the relevant PPE manufacturer, or (iii) where no such instructions exist, use of the Solo Rescue® without the user contacting the PPE manufacturer to receive such instructions or information.
