

PERFECT FIT

means great protection

mask

Check the mask.
Sling the neck strap over your head before fitting the mask to your face.

chin-up

Start with the chin.
Then cup the mask over your mouth and nose.

head

Pull the head strap over your head and position it on the crest of your head. **NEVER** fit the harness over a cap or a hard hat. Tighten the head harness at the buckle until the mask is tight but comfortable against your face.

balance

Pull the bottom straps outwards a few times to even out the tension and to make sure the top head strap is tight and secure.
