Welding Shield **SR 574**

WELDING SHIELD WITH WORLD CLASS RESPIRATORY PROTECTION

Welding Shield SR 574

The SR 574 welding shield attachment is a modern, innovative product for our appreciated SR 570, designed and developed based on the needs and requirements from the market.

Welding present numerous health and safety hazards, both for welders and for people in the vicinity.

As a welder, it is very important to protect your respiratory system and eyes against metal dust and fumes as well as sparks and spatter during welding and grinding operations.

The SR 574 welding shield is an attachment for the SR 570 face shield and is a part of Sundström respiratory protective system. The solution SR 574 with SR 570 is a robust face shield with a flip-up visor, that gives the user comfortable and safe respiratory and eye protection. The shield is manufactured in a material that permits use in tough environments.

The welding shield can be used with either our SR 500 or SR 700 fan units, equipped with our extensive range of filters that offer our users the highest protection level, TH3. If the work environment requires it can also be used with the compressed air attachment SR 507.

The shield is fitted with an attachment for hearing protectors. A wide range of accessories enable the user to customize the shield for their work situation.

BUMP CAP for protection against impact of stationary objects and splashes of molten metal

Fitted with attachment for **HEARING PROTECTORS**

WELL-BALANCED AND ERGONOMICALLY DESIGNED

NECK PROTECTION
Can be fitted with flame retardant neck cover

HEAD HARNESS
with several adjustment options for best fit

FLEXIBLE SUPER-FLEX HOSE

AIR FLOW DEFLECTOR
for maximum comfort

WELDING LENS in standard size 90x110 mm

EASILY REPLACEABLE VISOR in scratch-resistant polycarbonate

DURABLE VISOR
easy to flip up and with wide field of vision during grinding

READY FOR COMMUNICATION SYSTEM

APPROVED in class TH3 with powered fan unit and 3A, 3B with compressed air attachment

EXHALATION VALVE reduces the carbon dioxide content in the shield during heavy work
